INTRODUCTION

From the chill land of Naggaroth, the black-hearted Dark Elf legions pour forth. For thousands of years, the Dark Elves have plundered the riches of the world, using the blood and treasure of distant lands to fuel their wars.

From his iron throne, the Witch King musters his armies to assail civilisation. Corsairs descend on trading ports leaving only death in their wake, Sorceresses conjure the darkest magics to consume their foe, and crazed devotees of the Bloody-handed God slaughter their way across entire kingdoms. The craven may cower behind their walls, but nowhere is safe when the Dark Elves march to war.

WARHAMMER LEGENDS COMПENDIUMS

Every Citadel Miniature is a unique piece of the ever-evolving narrative of Warhammer. It is, then, an unfortunate truth that we can’t continue to sell and support every model we’ve ever made indefinitely. As we make new models, and new books to explore their background and rules, we have to stop producing and featuring some older models. But just like many of you, we still treasure our collections of older Citadel Miniatures, and we still want to be able to use them in games and forge glorious narratives on the tabletop!

This is where the Warhammer Legends Compendiums come in. They give us a place to publish rules that allow you to play games with your older miniatures. The rules are designed to be definitive, and will only be updated when we change the Warhammer Age of Sigmar core rules. This means that Legends units are not designed for matched play (as they won’t, for example, have yearly points updates).

ARMIES OF THE WORLD-THAT-WAS

The warscrolls in this compendium allow you to use Legends Citadel Miniatures to recreate the wars of the world-that-was using the Warhammer Age of Sigmar rules. It includes warscrolls for all of the Legends Dark Elf units, so you can include Dark Elf units and armies from the world-that-was in open and narrative play games.

We have also included warscrolls for Dark Elf units that fought in the world-that-was and whose descendents still fight in the Mortal Realms, the models for which are available as part of the Warhammer Age of Sigmar range. For example, a warscroll is included for Dark Elf Bleakswords, so that you can use the models as part of a Dark Elf army from the world-that-was. In addition, Bleaksword models can also be used with the Bleakswords warscroll in Grand Alliance: Order, as part of a Darkling Coven army from the Mortal Realms.

### Description

Malekith, the Witch King of Naggaroth is a named character that is a single model. He is armed with the Destroyer.

**Mount**: Seraphon attacks with her Noxious Breath, her Savage Teeth and Great Claws.

**Fly**: This model can fly.

### Abilities

- **Armour of Midnight**: If an attack that targets this model has a Damage characteristic of 2 or more, change the Damage characteristic of that attack to 1.

- **Circlet of Iron**: Add 2 to casting and unbinding rolls for this model.

- **Destroyer**: If the unmodified hit roll for an attack made by the Destroyer is 6, you can pick an artefact of power carried by the target. That artefact of power can no longer be used (if a weapon was picked when the artefact of power was selected, that weapon reverts to normal). In addition, if the unmodified hit roll for an attack made by the Destroyer is 6 and the target is a Wizard, you can pick one spell that Wizard knows. That Wizard no longer knows that spell.

- **Noxious Breath**: Do not use the attack sequence for an attack made with Noxious Breath. Instead pick an enemy unit that is in range and roll a number of dice equal to the number of models in the target unit that are within 6" of this model and visible to this model. For each 6 the target unit suffers 1 mortal wound.

- **The Price of Failure**: If a friendly Dark Elf unit within 3" of this model fails a battleshock test, only one model from that unit flees.

- **Supreme Spellshield**: Each time this model is affected by a spell, you can roll a dice. If you do so, on a 2+, ignore the effects of that spell on this model. In addition, if this model is affected by a spell and the roll to ignore the effect of the spell was 4+, the caster suffers D3 mortal wounds after the effects of the spell have been resolved.

### Magic

Malekith is a Wizard. He can attempt to cast two spells in your hero phase, and attempt to unbind two spells in the enemy hero phase. He knows the Arcane Bolt, Mystic Shield, and Bladewind spells.

- **Bladewind**: Bladewind has a casting value of 7. If successfully cast, pick an enemy unit within 18" of the caster and visible to them and roll a number of dice equal to the number of models in that unit. For each 5+ that unit suffers 1 mortal wound.

### Command Abilities

- **Absolute Power**: If you use this command ability, pick D3 friendly Dark Elf units wholly within 18" of a friendly model with this command ability. In the following combat phase, you can re-roll failed wound rolls for attacks made by those units.
