

# CODEx SUPPLEMENT: BLOOD ANGELS

Indomitus Version 1.0

These documents collect amendments to the rules and present our responses to players' frequently asked questions. Often these amendments are updates necessitated by new releases or community feedback; these can be identified by the presence of an asterisk before the page reference. At other times, these amendments are errata designed to correct mistakes or add clarity to a rule that is not as clear as it might be.

As they're revised regularly, each of these documents has a version number; where a version number has a letter, e.g. 1.1a, this means it has had a local amendment, only in that language, to clarify a translation issue or other minor correction. When a document is revised, the version number will be incremented and new updates will be highlighted in **blue**, while new errata and FAQs will be highlighted in **magenta**.

## FAQS

*Q: If the Sanguinor was set up in a location other than the battlefield, can it use its Miraculous Saviour ability in the first battle round of a battle from a mission pack that restricts units from arriving on the battlefield during the first battle round?*

A: No.

*Q: If I choose a **VEHICLE CHARACTER** model such as a Librarian Dreadnought to be my Warlord and I give it the Artisan of War Warlord Trait, does that Warlord Trait take precedence, allowing me to give the model one of the Special-issue Wargear Relics listed?*

A: No. A **VEHICLE CHARACTER** model would gain no benefit from that Warlord Trait.

*Q: The Angel's Sacrifice Stratagem is used and an enemy unit containing ten models is selected to fight. Only one model in that unit is within Engagement Range of the **CHARACTER** unit selected for Angel's Sacrifice. That one model must target that **CHARACTER** unit, but what about the other nine models – are they free to target another eligible unit, or are they prevented from attacking entirely?*

A: They are free to target another eligible unit.

*Q: The 'To Slay the Warmaster' Death Vision is used instead of making any attacks. Is that just the model with the ability that cannot make attacks, or is it also the enemy **INFANTRY CHARACTER** or **MONSTER CHARACTER** model?*

A: It is just the model with the ability.
