

# MUNITORUM FIELD MANUAL 2022 MK II

## POINTS VALUES FOR WARHAMMER 40,000

Welcome to the Mk II edition of the Munitorum Field Manual 2022. This document contains the most up-to-date points values that should be used in your matched play games, covering all the factions in Warhammer 40,000.

To work alongside the War Zone Nephilim: Grand Tournament mission pack, we have reviewed all our points values and, where necessary, updated certain unit and wargear costs.

You can use this document to determine the points (pts) value of each unit in your army. Each entry lists the unit's size (i.e. how many models the unit can contain) and how many points the unit costs. If an entry has a unit cost of 'x pts/model', then the unit costs x points for every model in that unit. You must then add the points for each weapon and other item of wargear included in that unit if it is listed in that unit's entry (weapons and other wargear not listed in a unit's entry cost no additional points to include in that unit).

The points values listed in this document replace any published previously, and should be used in your matched play games (or any of your games that are using points values). As with the previous edition of the Munitorum Field Manual, this document contains the points values for every single unit that, at the time of production, is supported for matched play games, eliminating the need to flip back and forth between two or more books.

We wish you luck on the battlefield.

- Robin Cruddace and the Warhammer 40,000 Rules Team
