The Sicaran Arcus was originally conceived to supply small, unsupported Astartes forces with highly specialised weapon systems, and combines the powerful Sicaran chassis with an Arcus launcher capable of firing a wide range of warheads. Despite the mysterious censure of the Adeptus Mechanicus, surviving examples of the tank continue to serve in battle with great honour.

The Stormbird was the design precursor to the Thunderhawk Gunship, conceived as a specialised, high-durability orbital assault craft that could land a Space Marine strike force in the face of heavy ground fire. Though largely superseded by the Thunderhawk, the Stormbird's capabilities as a mobile bastion and firebase are never overlooked by those factions who still possess it.
